EDUCATION

Yale University | **GPA: 4.00/4.00** | **SAT: 1590** **New Haven, CT** | **Class of 2029**
B.S. in Statistics & Data Science; B.A. in Ethics, Politics, & Economics
Relevant Coursework: Probability & Bayesian Statistics, Introductory Machine Learning, Introductory Microeconomics, Data Structures & Programming Techniques
Activities & Societies: Yale Undergraduate Consulting Group, Yale Debate Association (member), Yale Foreign Policy Initiative (member), Yale AI Alignment (fellow), Branford College Buttery worker

EXPERIENCE

Analyst | **Yale Undergraduate Consulting Group** **New Haven, CT** | Sep. 2025 – Present
• Modeling financial feasibility and social impact outcomes for a proposed West African cocoa farm venture, building a 10-year return model, and developing an impact framework to encourage private investment.

Student Worker | **Branford College Buttery** **New Haven, CT** | Sep. 2025 – Present
• Staff late-night student snack bar, managing transactions, inventory, and customer service within Branford College's residential community.

Researcher | **German Council on Foreign Relations** **New Haven, CT** | Sep. 2025 – Present
• Conducting long-term analysis of U.S. defense posture in Europe and the Indo-Pacific, in collaboration with researchers at the German Council on Foreign Relations (DGAP).

Researcher | **University of Maryland: College Park** **College Park, MD** | Jun. 2024 – Present
• Fine-tuned image classification models for emotion annotation. Collected and sanitized datasets, wrote Python scripts, compiled repository.
• Summarized findings, made clear figures/tables, and co-wrote paper with Dr. Cody Buntain.
• See **Assessing Emotions in Images and Potential Biases in Generative Models** below.

Research Intern | **Johns Hopkins Applied Physics Laboratory** **Laurel, MD** | Jun. 2023 – Jun. 2025
• Developed a demonstration pipeline for adversarial attacks on LLMs: organized jailbreak classes, authored red-team prompts, and stress-tested common guardrails (prompt injection, role confusion, refusal-circumvention).
• Programmed a full-pipeline Neural Network image classifier applied using computer vision.
• Engineered a computer vision program that enabled robots to autonomously follow target items.

Software Engineering Intern | **Cosmos Inc.** **Remote** | Aug. 2024 – Jan. 2025
• Built and integrated Unity (C#) UI components and debate-flow logic for an AI-powered debate training platform.
• Assisted UI/UX in Unity Engine, C# debate logic scripting, and backend on Amazon Web Services.

SELECTED RESEARCH OUTPUTS

An Analysis of GT Program Identification Procedures **Access:** DOI: 10.47611/jsrhs.v13i3.7404
Journal of Student Research 2024
• Literature review & interview synthesis of proposals to improve equitable outcomes in K–12 gifted education.

Assessing Emotions in Images and Potential Biases in Generative Models **arXiv:2411.05985**
Preprint 2025
• Presents an emotion/valence annotation pipeline for model-generated images and examines bias patterns and engagement-amplification risks.

LockdownGPT: Assessing adversarial attacks on LLMs **Internal publication; please request access**
Poster – Johns Hopkins University Applied Physics Lab Showcase 2025
• Literature review of systemic vulnerabilities faced by large language models in their development lifecycle; Fine-tuned and deployed a small demonstration model to showcase typical defenses.

AWARDS & HONORS

Scholarships: U.S. Senate Youth Program — \$10,000 Scholarship (2025)
Scouting: Eagle Scout (2024); Maryland Eagle Scout of the Year — American Legion (2025)
Debate: Top 20 National Finalist — Lincoln–Douglas (NCFL 2023); State Champion — LD (BCFL Metro 2024)
STEM: USA Computing Olympiad — Silver Division Qualifier; Morgan State University STEM fair Medalist

SKILLS

Programming Languages: Python, R, Java, C, C#, Racket
Software & Packages: PyTorch, scikit-learn, pandas, NumPy, OpenCV, Git/GitHub, Unity Engine, AWS, Figma
Languages: English, Spanish (Intermediate Fluency), Gujarati (Spoken Fluency)
